

Ballistic Performance Components Joins F1000 Pro Series as Partner Sponsor

Ballistic Performance Components has joined the F1000 Pro Series as a partner sponsor for the 2011 season. Ballistic Performance Components based in North Charleston, South Carolina, provides a range of high-performance batteries for power sports.

Ballistic Performance Component Batteries use the latest, state of the art lithium ferrous energy storage technology available that provides a smaller, lighter, higher energy battery. Each Ballistic Performance Component Battery is assembled by hand in the USA using computer designed custom proprietary cells, cases, and hardware. As a result, Ballistic Performance Component Batteries will provide more energy out of a smaller package while requiring almost no regular maintenance and under most conditions a longer service life than existing lead acid batteries.

Ballistic Performance Components LLC is a joint venture between the principles of KWS Motorsports (www.kwsmotorsports.com) and Millennium Technologies (www.mt-llc.com)

The F1000 Pro Series sponsored by Goodyear Racing Tires (www.racegoodyear.com), Williams Racing Developments (www.willrace) and George Dean Racing Engines (www.georgedeanracing.com), along with partner sponsors Jongbloed Racing Wheels (www.jongbloedracing.com), Elisabeth Jackson Motorsports Artwork & Designs, and Geartronics (www.geartronics.co.uk), and Hyperco (<http://www.hypercoils.com/>) is based on purpose-built high-performance Formula 1000 race cars and Formula 2000 converted race cars powered by 1000cc motorcycle engines, with top speeds in excess of 150 MPH. The F1000 Pro Series consists of 10 SCCA sanctioned National championship races at five venues over the course of the 2011 season.
